Martin List-Petersen

Carraigmór

Mulroog

Kilcolgan, Co. Galway

Ireland

eMail: martin@list-petersen.dk

Phone: +44 28 9099 5462

(IRL) 048 9099 5462

Cell: +353 87 935 9770

Objective:

To secure a permanent full time position covering field service, support, computer system administration, server maintainance, network planning and implementation.

Experience:

- Linux skills
 - Working with Linux since 1994
 - Favourites: Debian, Slackware (also tried a lot of other distributions)
 - Linux professional since 1996 (ISP and Content Providers / Administrator)
 - Experienced with MySQL, PostgreSQL, Oracle, Sybase, MS-SQL (no .. thats not Linux, but it can be accessed by Linux, if necessary :))
 - Extensive Cluster (LVS and OpenMosix), VPN and Firewall experience
 - Filtering and Virus scan server side on mail and web-based services, minimizing risks
- Non-Linux skills
 - Basic knowledge of Sun Solaris, FreeBSD
 - Cisco router configuration and maintainance
 - Checkpoint setup and administration
 - Win NT/2k/2k3 administration, Exchange, MS-SQL
 - GSM/Cellular services (SMS, Dial-in, WAP, GPRS)
 - ISDN (digital telephony)/pots services
 - Extensive VoIP experience (Cisco, Asterisk, SER, etc.)
 - Experience with tape robots (HP, ADIC, Benchmark)
 - Experience with SAN environments (Dell PowerVault, Clariion, EMC).
- Programming

- Extensive knowledge of Basic, Pascal (Borland/Free Pascal) and PHP
- Basic knowledge of Perl

Certifications:

- *DCEE/F* - Dell Certified Enterprise Engineer, Foundation Level

Work Experience:

Present - Freelance IT and Communications Project Manager, based in Co. Galway/Ireland

My current occupation spans from being the CTO for a local ISP (Airwire, Co. Galway), implementation and distribution of pc based telephony hardware with VoIP capabilities (TuxBox, Co. Galway, but worldwide active and Project Manager for Mandriva Ireland, Castletownshend, Co. Cork) and work as part time system administrator for other ventures (Denmark, Ireland, Netherlands).

April 2005 - blue tree systems Ltd. in Galway/Ireland

blue tree systems hired me as IT Systems and Support Engineer. The job covered system administration for blue tree systems employee's, support, training and troubleshooting on their products for customers from Galway or on site, which basically can be anywhere in Europe or Northern America. blue tree systems works with data acquisition and telematics for the hauling business. Originally the customer base were temperature controlled vehicles equipped with fridge units from Thermo King, but ever since the product range has been expanded to cover complete Fleet Management and Tracking. Data are automatically transferred via wireless short range transmitters, once a vehicle arrives at a warehouse or via gsm/gprs while on the road. My job also covered test of software and pre-production units, before they were released into the market.

March 2005 to present - Bransholm & Blæsbjerg A/S in Vejle/Denmark

I maintain the serverpark for Bransholm & Blæsbjerg A/S consisting of servers based on Linux in 3 locations in Denmark. This job is done remotely from Ireland, since I usually don't need physical access to the servers. Brandholm & Blæsbjerg A/S is specialized in Internet marketing via email & banners.

January 2004 - Dell Direct in Cherrywood/Dublin/Ireland

As of January 2004 I transferred to the Dell EMEA Enterprise Expert Centre. My work as a Senior Analyst with Dells Gold and Platinum Contract customers covers all of the EMEA region. The EEC delivers this service 24x7, 365 days a year, so my working hours varied quite a bit. Originally I primarily worked with servers and smaller tape units, transferred later to the TBU team, which specialises in tape robots (Benchmark, HP, ADIC, StorageTek), SAN integration in EMC and Clariion SANs and software for these, but I also touched other parts of Dells enterprise products now and then.

October 2002 to January 2004 - Dell AB in Stockholm/Sweden

In 2002 I was hired as Senior Server Technician at Dell AB (the Nordic part of Dell Corp.), supporting customers in the Enterprise branch of the company. This is mostly troubleshooting of hardware, software problems, consulting customers in technical product questions and dispatching parts and an on-site technician, if necessary. The customers I did support were based in Denmark, Sweden, Norway and Finland. *Dell's Mission Statement* : To deliver the best customer experience in the markets we serve.

February 2002

Freelance development for different companies developing payment solutions (with online/dial-up credit-card processing), installing and maintaining Linux servers and implementing cellular content services.

April 2001 - embedded wireless devices inc. in Pleasanton CA/USA and Horsens/Denmark
ewd was a startup semiconductor company developing embedded wireless telephony and network products. My first assignment was Linux/Unix specialist for the whole company and network administrator plus helpdesk for the Danish subsidiary. I was later promoted to corporate-wide system and network administrator. This also included a lot of traveling between Denmark and the USA. The network was mostly based on Windows 2000 workstations and servers with some Linux and Sun Solaris machines. For firewall and vpn we used Checkpoint solutions. Due to a lack of funding, ewd unfortunately was bankrupted by mid 2002.

November 2000 - Portaltjenesten A/S in Vejle/Denmark

Portaltjenesten A/S develops and hosts online community portals based on PHP and Javascript. Hosting is done on Linux servers (Debian and SuSE) and Oracle or mySQL is used for the SQL backend. For a dating portal the traffic got so high, I had to implement a web-clustering solution.

June 2000 - Exitec AG in Flensburg/Germany

Exitec AG develops online communities, mainly targeted to reality TV shows (Big Brother, Temptation Island etc.). I was hired as web developer and backup for the system administrators (internet services, internal network, Linux technical support for co-workers, consulting on telephony services) especially because of my knowledge of the Danish market. The whole community toolbox is developed in PHP and JavaScript and hosted on a Linux cluster solution with mySQL/Linux and MS-SQL/Windows 2000 SQL back ends (different databases for different needs).

January 2000 - Call Center Europe A/S in Sønderborg/Denmark

Call Center Europe A/S is Denmark's largest call center. Major owner is TDC, the former monopoly Telco in Denmark. My job was support and sales by telephone for different customers (Acer Computers, etc.). This was done in Danish, English and German. I worked there until September 2000.

February 1999

Together with Plomus (<http://www.plomus.dk>), I started a freelance business, providing Linux consulting, server installation and maintenance, and selling merchandise. I also started my own web and mail hosting company, which was specialized in custom online services.

February 1997 - interCom danmark aps (later TelePassport A/S) in Kolding/Denmark

TelePassport A/S was a Telco, providing telephony, cellular and internet services, backbone and telephony equipment. I was hired as a Technical Development Manager with the responsibility of establishing an internet service provider. I also had the network administrator and support function for internet and telephony related products until two additional system administrators were hired.

May 1995 - Datascan in Vester Sottrup/Denmark

Datascan is a computer shop and consulting company. My job was assembly and installation of PCs, setup of customer networks and software development in Basic, Pascal and Access.

Offtime projects:

In my spare time I work with some software projects, do talks on VoIP and Linux related subjects and do some consulting work for ISPs and ITSPs. I play a lot around with IP telephony and long distance wireless networks in general, I'm a unofficial packager for one of the bigger Linux Distributions and spend some time writing howto's on several issues. Quite a bit of the documentation and development efforts, that i work with, can be found on my personal website <http://www.marlow.dk>

Education: High School until 11th grade at an international High School in Denmark.

Birthday: 19.7.1975

Languages: Danish, German, English, Swedish.
